

Name _____

Rocket Life: My Mission, My Passion, My Life

Life should be like a space mission to the moon. You should spend your time on earth working on something you are passionate about. Complete the drawing of the rocket below. Happy people typically have a job or career that is in line with their skills, interests, and passions. Fill in the chart below with as many ideas as you can think of. Start at the bottom. Take your time and really reflect on what you enjoy doing, what you are naturally good at, and the ideas/beliefs you are passionate about. These are the three rockets that will send you on your life's mission. What career paths naturally use these three skills? Think of some opportunities you can take advantage of today, right now, that lead you in that direction (internships, volunteer opportunities, job shadows).

Possible Life Mission:

Opportunities I could take advantage of that relate to my interests, skills, and passions:
